- *Addiction and Weakness of Will*. Oxford: Oxford University Press, 2013, 160pp.

A dense and serious exploration of foundational issues in moral psychology, with an eye most especially on the conditions under which agents are morally responsible for akratic behaviour... Specialists in moral responsibility and moral psychology will benefit considerably from reading Radoilska's view, especially her sustained criticisms of accounts that currently dominate the landscape. Neil Levy, Melbourne University. *Notre Dame Philosophical Reviews* (2014)

Further review in *Heythrop Journal* 56(4) 2015

- *Aristotle and the Moral Philosophy of Today* [L'Actualité d'Aristote en morale]. Paris: Presses Universitaires de France, 2007, 308pp.

This is an extremely interesting work on a topical subject; the arguments are developed in a lucid and insightful way. Marco Zingano, University of Sao Paolo, *Revue Philosophique de Louvain* 2010, 108.

Further review in *Revue Philosophique* 2008, 133

Edited Book

- *Autonomy and Mental Disorder*. Oxford: Oxford University Press, 2012, 328pp.

[This collection] shifts the parameters of the debate in important ways, by opening up new lines of inquiry, asking new and different questions, and forcing us to consider many long held assumptions. This is a rich, diverse and engaging collection of essays that would be of immense use to researchers and clinicians. Sarah Sorial, University of Wollongong, *Metapsychology Online Reviews* 17:52 (2013)
